*COMPOSITE FILM
PATERNOSTERS*

Förder- und Lagertechnik

Composite film paternosters

Our solutions for rolled goods.
Optimized storage for film, CFRP, GFRP,
CV goods, tarpaulins, artificial turf, etc.

We design and manufacture according to your roll widths
and spatial capacity for optimal roll storage.

The dynamic system of racks enable optimal handling of your stored goods.

Short access times and reliable operation through simple electronic control
are features of the machines.

COMPOSITE FILM PATERNOSTERS

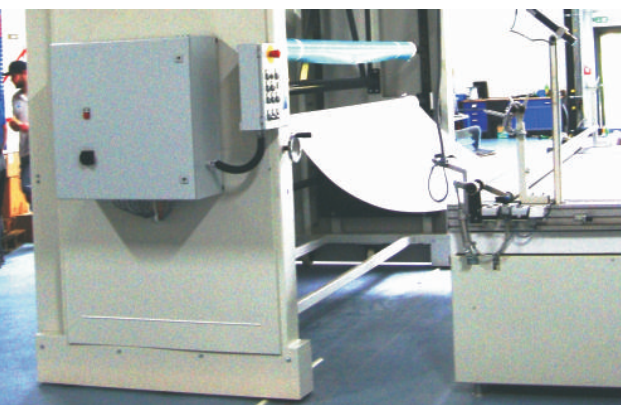

For straight-edge guiding the paternosters can be moved on rails. Control is via an electric light barrier.

On request, we can also offer an automatic bar drive. By this controlled drive the material is handled easily and can be fed to a cutting system with ease.

By cones the rolls are firmly fixed on the support bars. Slippage is not possible.

The paternosters can get equipped with an advanced loading point e.g. for loading by crane.

Customer designed shapes, such as L- or U-shapes, are also possible here.

Our experience - your benefit

schwab Förder- und Lagertechnik has been established for more than 60 years and, with its skilled employees, has the proven experience and flexibility to satisfy the demands of customers, both large and small in this specialised trade.

schwab's ideas, engineering skills and manufacturing know-how provide products for smaller companies as well as equipment for international industries.

Try us - we look forward to your challenges.
